# BALTECO

Thirty-five years ago, a small group of talented and ambitious engineers united to establish Balteco. Their shared aspiration was to create practical and timeless bath designs that would transcend the trends. Today, Balteco has grown into one of Northern Europe's leading manufacturers of exclusive bathtubs, recognized for its unwavering commitment to quality and design.

Introducing the Xonyx solid surface bath collection - an exclusive selection of freestanding bathtubs that reflect Balteco's passion for innovative and elegant design. Each bathtub is handcrafted using the finest materials, ensuring a luxurious and durable product. Join us in experiencing the unmatched quality and sophistication of Balteco's Xonyx collection.

# EXQUISITE NORDIC DESIGN

Radically simple and exceptionally enjoyable.

A design statement made possible by intricate engineering and passion for timeless design.

## WHAT IS XONYX?

Xonyx is an unique polymer composite material composing of modified polyester resins with acrylic compounds, ATH (aluminium trihydrate) mineral filler and additives developed by Balteco R&D laboratory.

With original SPS (Slow Polymerization System) method applied, Xonyx is providing the best performance characteristics – superior structural strenght and durable scratch resistant antibacterial surface with easy-to-clean properties make it a highly valuable material for different applications.

Xonyx products (bathtubs, basins, tabletops, shower trays) have acclaimed worldwide recognition and success - value adding and innovative, Xonyx is great alternative to natural stone, gel-casted marble or ceramic.

ANTIBACTERIAL (non-porous)

## UNIQUE XONYX SOLID SURFACE BATHS

- › Timeless designs
- › Innovative construction
- › Silky-smooth surface
- › Installation made easy
- › Any exterior in a RAL color palette
- › Delicate, yet effective overflow
- › Matching waste cap

## SMART DESIGN & COMFORT

The innovative construction of Xonyx solid surface freestanding bathtubs employs dual wall architecture with tub's inner and outer walls seamlessly integrated to create a durable monolithic bathtub. Dual wall construction allows for contoured ergonomic inner surfaces and elegant external design lines. The space in between the two walls acts as an effective thermal insulator, reducing heat loss and keeping bath water warm longer.

XONYX™

Xonyx bathtub comes with a sturdy galvanized steel bottom frame with adjustable feet that are completely hidden from a view. This novel construction offers extra space under the bath for a hidden drain connection assuring easy installation without the need for bathroom floor reconstruction.

## INSTALLATION MADE EASY

Beauty meets practicality.

## UNIQUE TECHNOLOGY: HARD SURFACES

Xonyx solid surface is a superb material perfected through an implementation of an innovative Slow Polymerization System (SPS) production technology. SPS production technology brings out the best performance characteristics of this remarkable solid surface material.

Xonyx solid surface bathtub is machined to provide an extraordinary silky-smooth surface with a satin impression, making the material warm and pleasing to the touch while retaining its easy-to-clean properties.

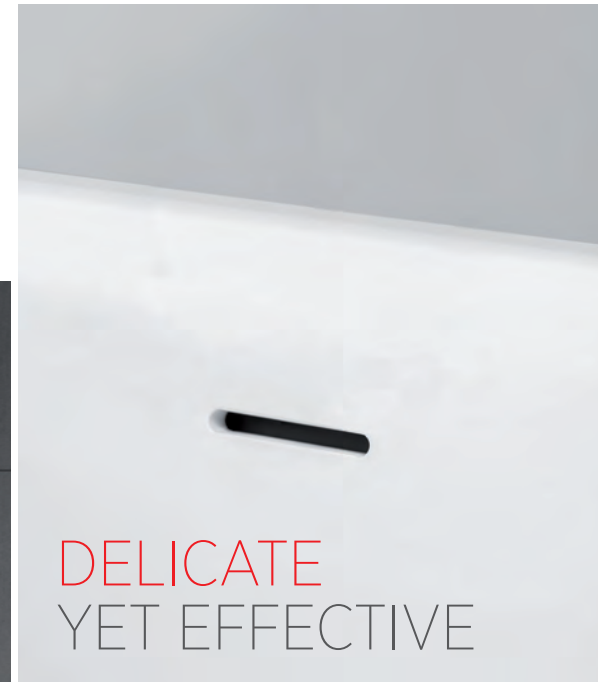

Simply irresistible to touch.

## SILKY-SMOOTH SURFACE

## EXCLUSIVE XONYX WASTE

It's white it's Xonyx – blending with the bathtub's finish, white Xonyx waste plugs are an almost invisible yet elegant detail. All-white satin surface Xonyx solid surface bathtubs allow matching with tap mixers, bathroom accessories or décor of any finish.

## DELICATE YET EFFECTIVE

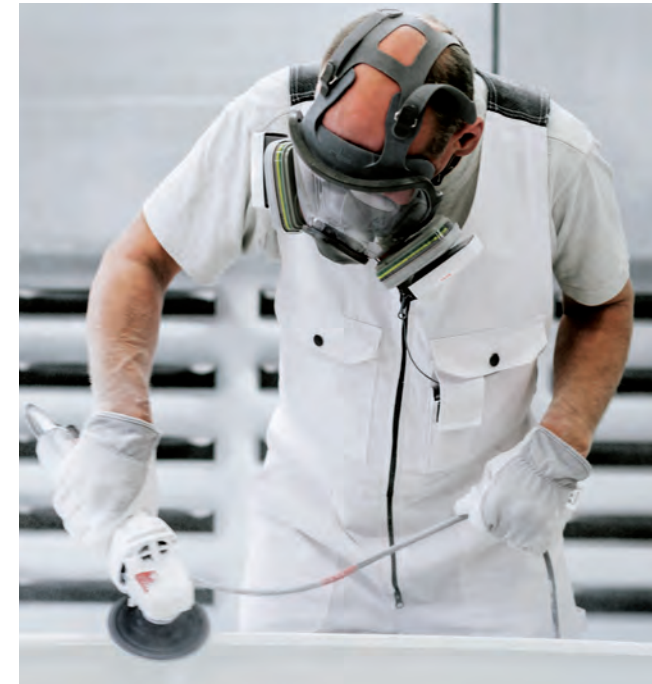

The discreet integrated overflows on Xonyx solid surface bathtubs are spectacularly neat yet intelligently engineered. The overflow system, with just a small minimalist machined slot and hidden custom-designed piping, delivers overflow rates that exceed plumbing requirements.

No protrusions, no external pipes. Simply beautiful.

## METICULOUSLY HAND-CRAFTED

Xonyx solid surface bathtubs are hand-made to honour the value of traditional Scandinavian craftsmanship and deliver exceptional quality. Aspiring for perfection, every bathtub is carefully hand-crafted by experienced masters with no detail being overlooked from casting to thorough final testing.

Dedication is the key to achieving perfection.

## ANY COLOUR YOU LOVE

Offering full freedom in bathroom decoration, Xonyx solid surface bathtubs are available in virtually any bathtub exterior colour finish imaginable – the full RAL colour pallet range is available.

## HOW TO CARE FOR XONYX™ SURFACES

XONYX™ is a remarkable material that is durable yet the products look stylish and elegant. XONYX™ Solid Surface products have a silky surface finishing that feels smooth and luxurious.

To keep XONYX surfaces looking as good as new, it is recommended to wash the surfaces with mild detergent, warm water and a soft, non-abrasive sponge or microfiber cloth. Most household cleaners are suitable to remove any dirt and stains that may occur on the surface over time.

For lime deposits, a gentle rub with a descaling agent on a microfiber cloth or sponge cleans the surface. For tougher residues, it is necessary to leave the descaling agent on for up to 5 minutes, then to rinse off with hot water and dry the surface with a soft microfiber cloth.

XONYX™ is resistant to most chemicals, but some may cause permanent and irreparable damage.

If the surfaces come into contact with aggressive chemicals, act quickly and clean the surface with plenty of water and detergent to prevent permanent stains. To avoid any discoloration, it is not recommended to use colored detergents or products such as:

- Nail polish
- Hair dye
- Self-tanning or oil-based products (hair oil) etc.

XONYX™ solid surface is scratch-resistant, but cutting on the surface must be avoided.

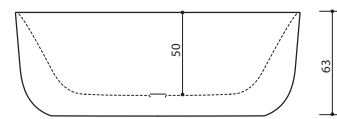

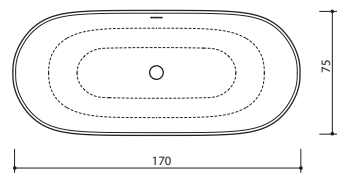

XONYX™ can withstand medium temperatures and it is not allowed to place hot objects directly on the surface.
