35 YEARS OF EXPERIENCE IN PRODUCT DEVELOPMENT AND MANUFACTURING

Balteco AS was founded in 1990, and over the years, it has risen to become one of the leading companies in the development and manufacturing of high quality hydromassage baths in Northern Europe. This comprehensive acrylic bathtub collection includes an exclusive selection of various acrylic bath forms in various measurements to meet every customer expectations.

More than 100,000 satisfied customers across Europe are a proof of a sustainable, innovative continuous product development, award-winning design and high quality of manufacturing. Balteco has always been an innovator of hydro-massage baths, bringing over the years several valuable functions and technical solutions like adjustable intensity back-massage systems and safety suctions to mention a few, which have later become industry standards adopted by other manufacturers.

Since high quality and reliable functionality are absolutely crucial to Balteco, all materials and components have been carefully selected and perfected over the years to ensure the uniqueness and high value of Balteco hydromassage baths. Offering the absolute best hydromassage bathtubs has been and remains to be Balteco's main goal.

In addition to design expertise and product development, Balteco also utilizes modern production facilities and a highly experienced, trained staff, which guarantees the high quality craftsmanship.

Balteco manufacturing meets ISO 9001 quality assurance standards already from 1999 – Kiwa is responsible for testing the quality and safety of the products against all applicable standards.

SLIMLINE HYDRO SYSTEM UPGRADE: NOW AVAILABLE IN THE EXCLUSIVE BLACK EDITION

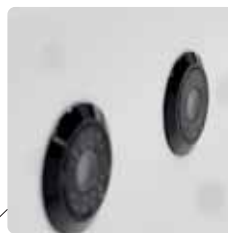

New

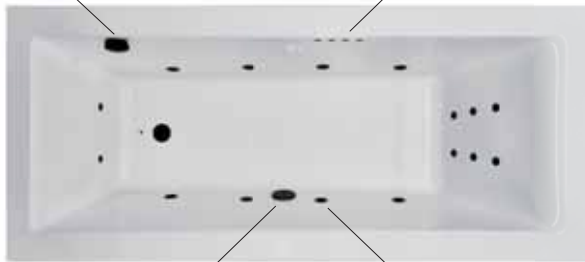

Experience premium design and superior engineering, all wrapped up in a sleek, visually matching black finish:

Overflow and drain

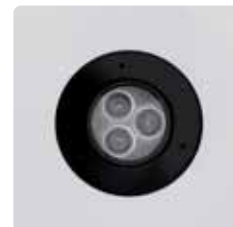

Control buttons

Water suction

Massage jets

Ambilight

EXTRA OPTIONS:

- Bathtub front panel coated with black film (only available for rectangular models)
- Black bathtub mixers
- Ambilight LED-lighting

ELECTRONIC CONTROL PANELS

PLATINUM

Control panel for system: S7, S8, S10

EVO

Control panel for system: S3, S4

SLIMLINE HYDRO

Control panel for system: S11

- The best choice for single water pump systems
- Stylish, minimalist fittings
- Graduated three-zone massage control
- Also available with black detail finishing

PANEL+ UNIQUE AESTHETIC LOOK

Purity in details and fast installation – a PANEL+ solution offers higher value-add than any other producer on the market.

Advantages of PANEL+:

- ① L-type acrylic panels without visible connection
- ② Curved panel ends (no visible cutting lines)
- ③ Clean panels without screw caps – unique magnet fastening of panels

UNIQUE HYDROMASSAGE BATHS

EXCLUSIVENESS IN DETAILS

Only manufacturer in Northern Europe to offer chromed brass covers for under-water jets. Balteco does not use plastic covers that are remarkably less resistant for scratches.

AUTOFILL

An electronic bath fill-up assistance system allows for convenient and safe bath filling. Upon AutoFill activation the water flow from the bath mixer is automatically stopped when bath is full of water and system gives attention sound signal.

AMBILIGHT LED-LIGHTING

Custom designed chromotherapy lighting systems have been designed using the latest RGB LED technology delivering a wide variety of bright color tones or a slow color rotation program.

HIGH QUALITY SANITARY ACRYLICS

All Balteco acrylic baths are made of high quality sanitary acrylics, Altuglas (France)

100%
Sanitary
Acrylics

- Durable
- Chemically resistant
- Non-allergenic
- Non-porous surface
- Easy to clean
- Low thermal conductivity
- Deep gloss
- Repairable

SILENT AIR BLOWERS

Airmassage system is equipped with efficient and silent pre-warmed air blowers (500 W)

POLYCORE™ REINFORCEMENT

Reinforced bath bottom structure triple layer technology makes the bottom extra strong

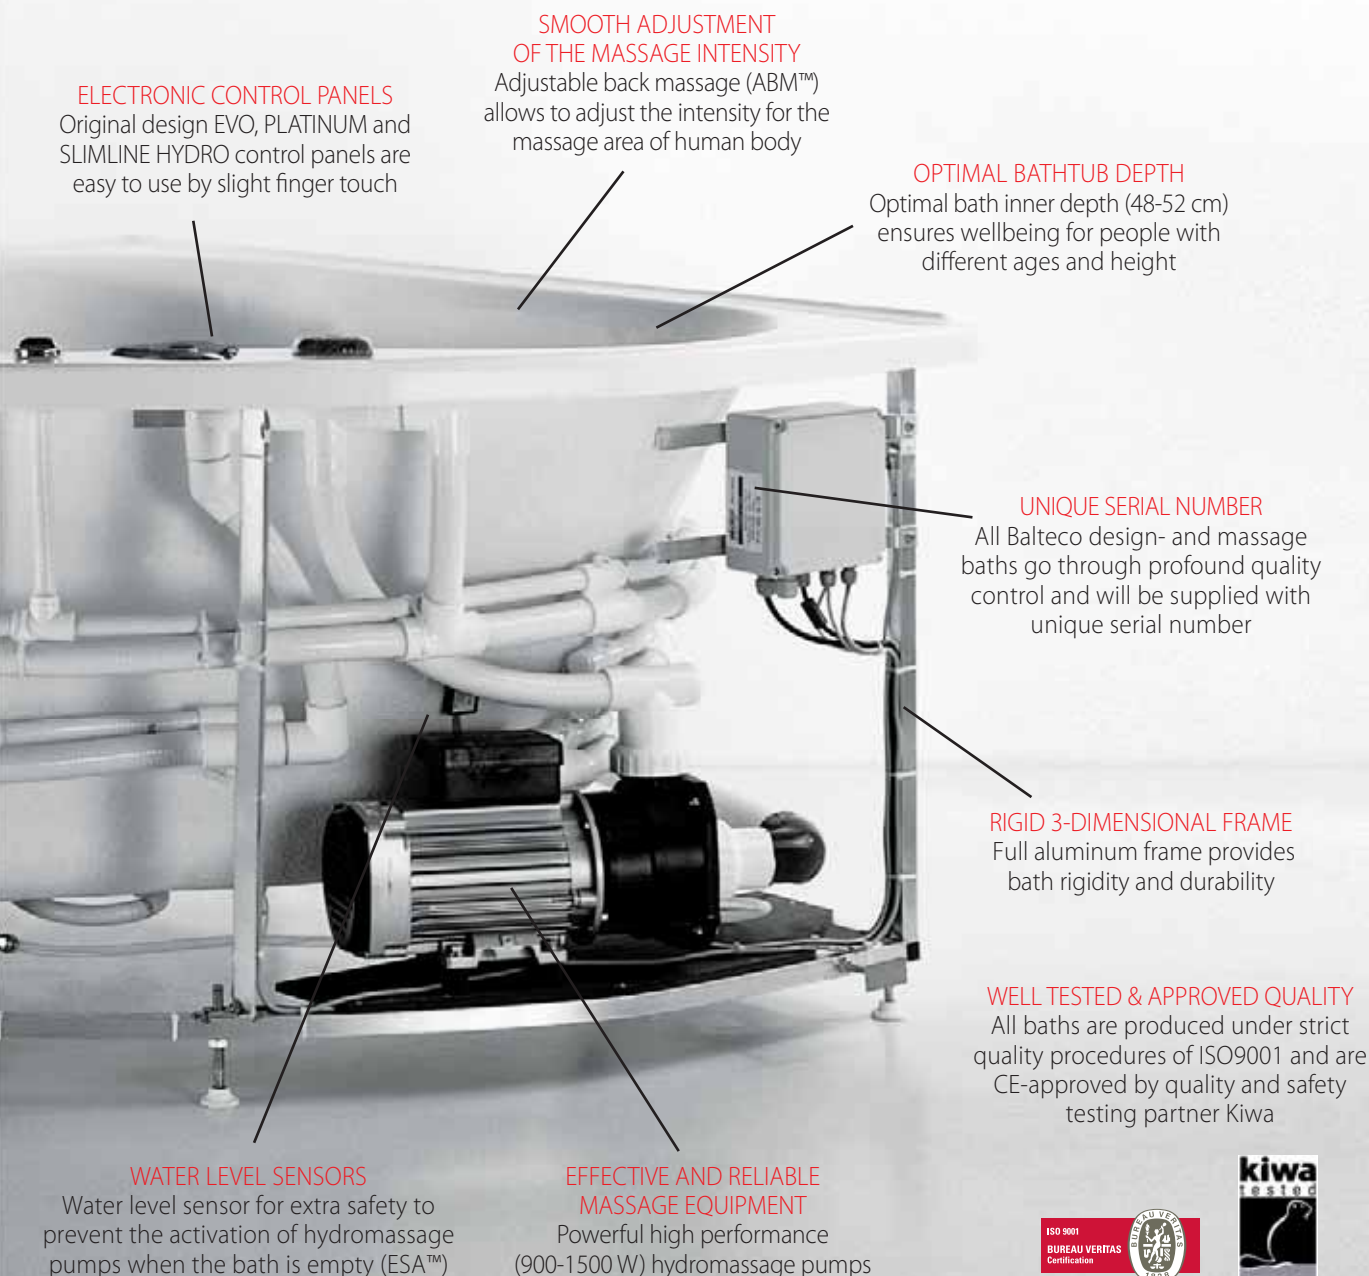

Balteco was the first company to introduce adjustable back-massage systems (ABM™) – nowadays it has become a standard amongst quality manufacturers. Still, Balteco hydromassage baths offer more through the unique adjustable back massage system. Custom designed water diverter placed on a bath rim allows for smooth manual adjustment of the backmassage intensity from full power of backmassage to no back area massage at all.

All Balteco hydromassage baths are equipped with a unique extra safety package ESA™ (Extra Safety Assurance). Package includes: a water level sensor preventing pumps from activating in an empty bath, a water inlet suction with high-volume suction cover and integrated safety valve, and double earthing.

Unique Balteco hydromassage baths are a result of several decades of goal-oriented hard work in design and engineering of the baths and its functions. Invaluable know-how may only be gained through long-term process of analysing extensive customer feedback and continuously implementing product improvements – at Balteco we have followed these principles to find success. Several improvements, like adjustable intensity back-massage systems and safety suction, to mention a few, were truly novel functional improvements that later became industry standards adopted by most quality manufacturers.

Years of devotion in product development and careful selection of bath designs has resulted in probably one of the best hydromassage bath ranges on the market.

For larger interior size hydromassage baths Balteco offers in addition to a standard one pump system also a system with two powerful pumps DHP™ (Dual Hydromassage Power). DHP™ consists of two separately mounted massage systems with separates function and controls. One pump provides for an effective general hydromassage and the other one for the back and footmassage systems.

As valuable enhancement to increase the intensity of hydro-massage even further, Balteco offers to its massage baths electronic turbo massage systems ETM™ (Electronic Turbo Massage). Electronic function may be activated by an easy touch of a button and water-air mixture pressure from water jets is maximized.

VS2R/X	Made-to-measure RIGHT, specify size/glass

VS2R

SHOWER SCREEN VS3

Fixed bath screen for rectangular bathtubs. Features 6 mm tempered safety glass and aluminum profiles. The upper support must be ordered separately.

Also available made-to-measure (custom size): width 400-900 mm, height 1000-1600 mm.

VS3/T1/PrA	81x148 cm, clear glass, anodized aluminum profile
VS3/T2/PrA	81x148 cm, toned glass, anodized aluminum profile
VS3/T1/PrG	81x148 cm, clear glass, glossy aluminum profile
VS3/T2/PrG	81x148 cm, toned glass, glossy aluminum profile
VS3/T1/PrM	81x148 cm, clear glass, black aluminum profile
VS3/T2/PrM	81x148 cm, toned glass, black aluminum profile
VS3/X	Made-to-measure, specify size/glass/profile

VS3

NB! When ordering a bath screen as a separate order, ensure that there are no obstacles on the rim of the existing bathtub during product installation and subsequent use.

SHOWER SCREEN VS4

Fixed bath screen for rectangular bathtubs, featuring 8 mm tempered safety glass and aluminum profiles. The upper support must be ordered separately.

Also available made-to-measure (custom size): width 400-900 mm, height 1000-1600 mm.

VS4/T1/PrA	81x148 cm, clear glass, anodized aluminum profile
VS4/T2/PrA	81x148 cm, toned glass, anodized aluminum profile
VS4/T1/PrG	81x148 cm, clear glass, glossy aluminum profile
VS4/T2/PrG	81x148 cm, toned glass, glossy aluminum profile
VS4/T1/PrM	81x148 cm, clear glass, black aluminum profile
VS4/T2/PrM	81x148 cm, toned glass, black aluminum profile
VS4/X	Made-to-measure, specify size/glass/profile

VS4

SHOWER SCREEN VS5

Framed fixed bath screen for rectangular bathtubs. Features 6 mm tempered safety glass and black aluminum profiles around the glass. The upper or ceiling support must be ordered separately.

Also available made-to-measure (custom size): width 300-900 mm, height 1200-2000 mm.

VS5/T1/PrM	85x152 cm, clear glass, black aluminum profile
VS5/T2/PrM	85x152 cm, toned glass, black aluminum profile
VS5/X	Made-to-measure, specify size/glass

VS5

UPPER SUPPORTS

The upper support suitable for models VS3 and VS4:

KTL90A	Upper support for 6 or 8 mm glass. 90 cm, can be cut if necessary. Suitable as a cross or corner support. Anodized aluminum.
KTL90M	Upper support for 6 or 8 mm glass. 90 cm, can be cut if necessary. Suitable as a cross or corner support. Black aluminum.

The upper and ceiling support suitable for model VS5:

KTL90RM	Upper support, 90 cm, can be shortened if necessary. Suitable as a cross or corner support. Black aluminum.
LT26M	Ceiling support, black aluminum.

An electronic bath fill-up assistance system allows for convenient and safe bath filling. When bath is full of water, system also gives a sound signal.
Available for any system/bath.

SUPERSOFT PILLOW

Code: MSV
Soft bath pillow with suction cups.

OVERFLOW FILLING

Code: OS
Chrome finish.
Bath filling through the overflow.
Alternative option for mixers without spout.
Available for any system/bath.

OVERFLOW FILLING (black)

Code: OSM
Black finish.
Bath filling through the overflow.
Alternative option for mixers without spout.
Available for any system/bath.

OVERFLOW FILLING (white)

Code: OSV
White finish.
Bath filling through the overflow.
Alternative option for mixers without spout.
Available for any system/bath.

1

2

OVERFLOW/DRAIN (black)

Code: M
Black finish
The set includes a slim-shaped overflow cover and a click-clack drain.
Available for system S1.

OVERFLOW/DRAIN (white)

Code: V
White finish
The set includes a slim-shaped overflow cover and a click-clack drain.
Available for system S1.

3

1. Cleaner for acrylic surfaces, 750 ml (code: PA)
2. Cleaner for glass surfaces, 750 ml (code: PK)
3. Desinfection cleaner for hydromassage system PipeCleaner, 250 ml (code: PD)

MECHANICAL TURBOMASSAGE

Code: W
Turbulent jet flow effect is created through the mechanical direction of both pressurized air and water into the hydromassage jets.
Available for systems S4, S7, S8.

WATER HEATER

Code: H1,5 or H3
Heater can be individually turned on and off while the massage pump is working.
Available for any system, except S1.

BATH MIXERS

The bath mixer is not included as standard equipment with the bathtub; it must be ordered separately. The price of the Balteco mixer includes the necessary drilling on the bathtub rim but does not include the mixer's installation (it comes in its original package).

Drilling mixer holes for mixers supplied by the customer is available for an additional charge. Drilling requires the submission of the mixer's technical installation drawing.

Mixers without a spout have the following filling options: via the jets (code: RF) or via the overflow (codes: OS, OSM, or OSV).

C1K

Cristina two-component bath mixer (Chrome)

C1M

Cristina two-component bath mixer (Black)

BATH MIXER HOLES

Code: MH

Factory-drilled mixer holes for a customer-supplied mixer, based on the provided installation drawing.

A person is seen from behind, relaxing in a hydro-massage bath. The water is filled with numerous bubbles, creating a textured, blue-toned background. The person's head and shoulders are visible at the bottom of the frame, partially submerged in the bubbling water.
